

Evidence of sprint cycles

4 screenshots of boards using trello

Tasks that were un-completed and completed tasks

The image shows a digital task management board with two main columns: 'Backlog (uncompleted tasks)' and 'Release (Tasks completed)'. The 'Backlog' column contains several task cards, some with green headers and others with orange headers. The 'Release' column shows a sequence of task cards, each with a blue header, indicating a workflow. A yellow smiley face icon is visible at the top of the 'Release' column.

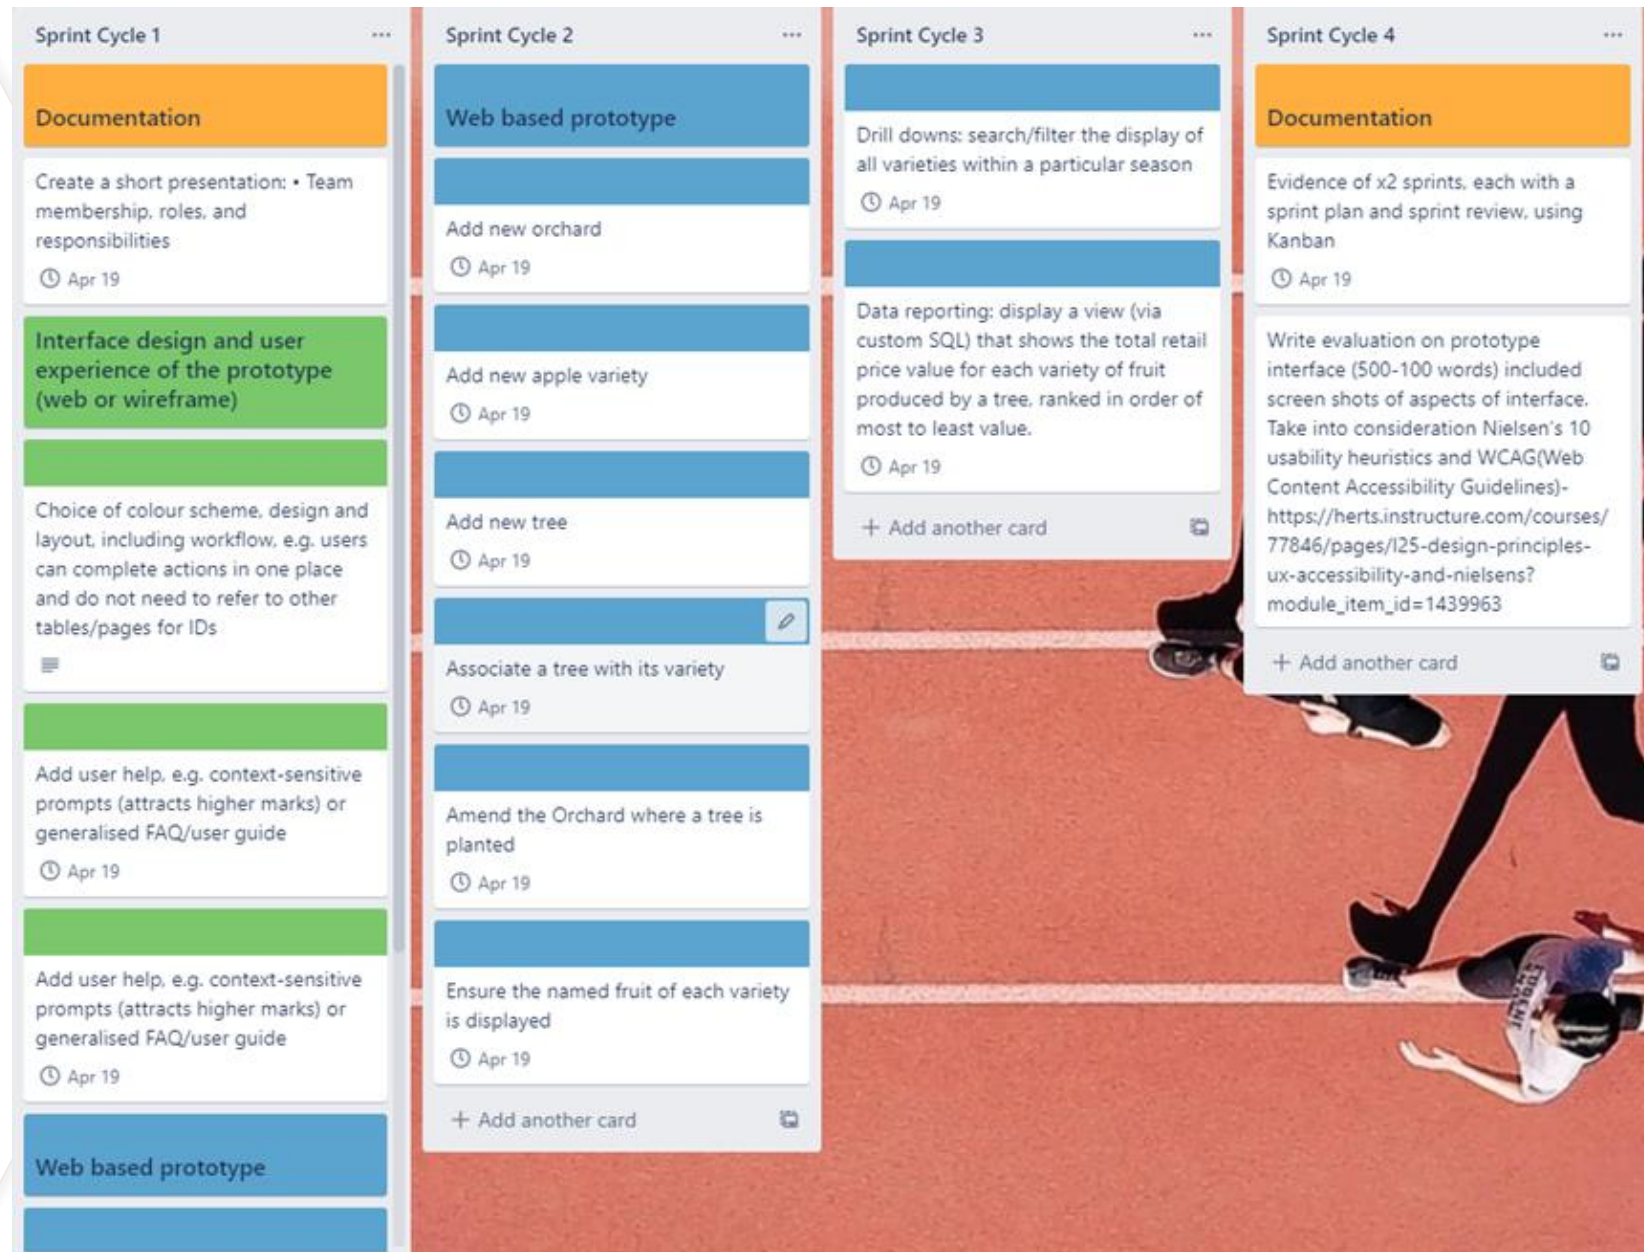

Backlog (uncompleted tasks)

- Interface design and user experience of the prototype (web or wireframe)
- Choice of colour scheme, design and layout, including workflow, e.g. users can complete actions in one place and do not need to refer to other tables/pages for IDs
- Add error and/or feedback messages that are meaningful after user actions
- Add user help, e.g. context-sensitive prompts (attracts higher marks) or generalised FAQ/user guide
- Documentation**
- Evidence of x2 sprints, each with a sprint plan and sprint review, using Kanban
- Create a short presentation: • Team membership, roles, and responsibilities
- Write evaluation on prototype

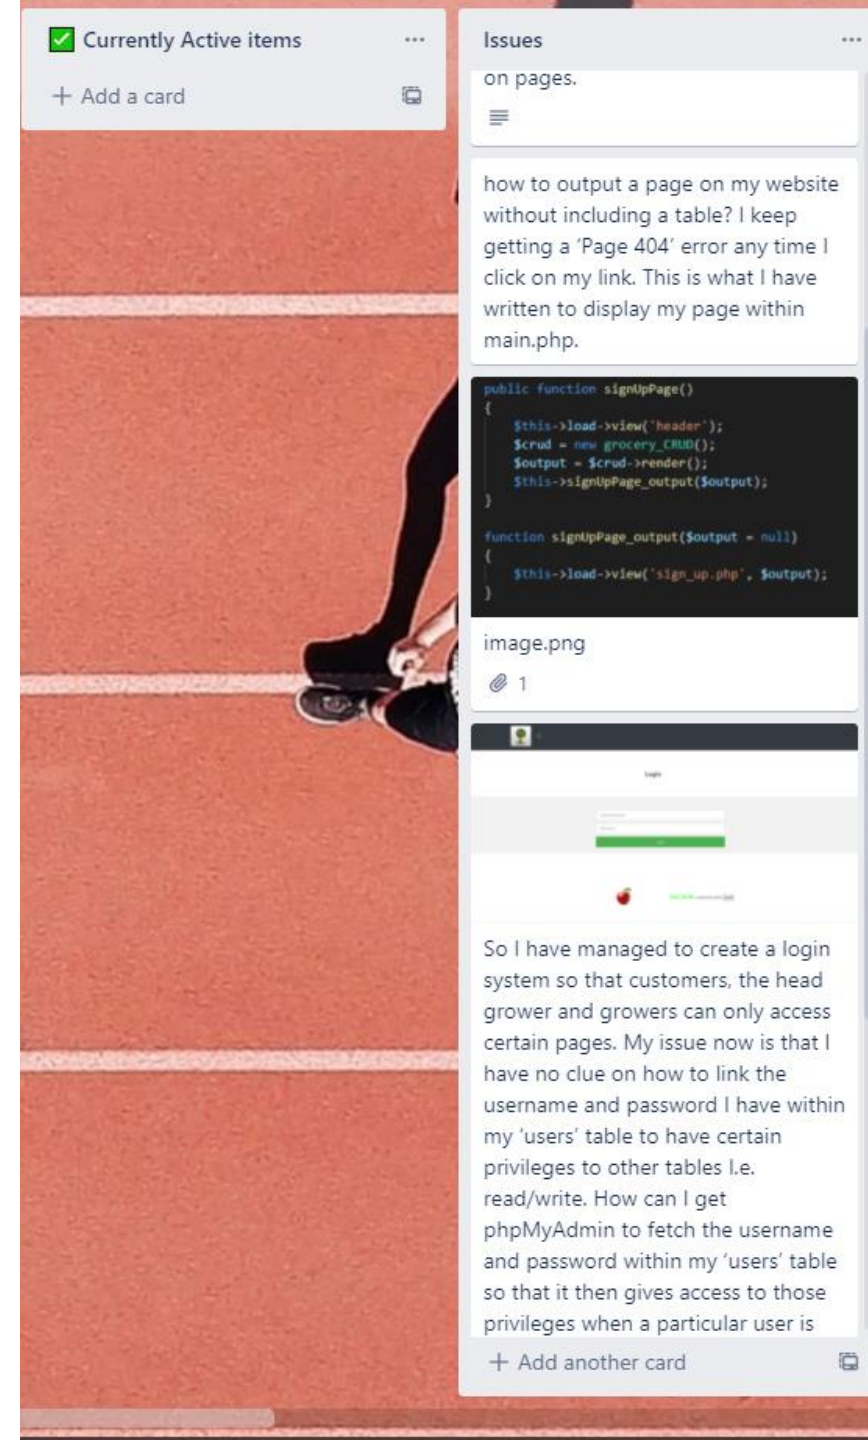

Release (Tasks completed)

- image.png
- Web based prototype
- Add new orchard
- Add new apple variety
- Add new tree
- Associate a tree with its variety
- Amend the Orchard where a tree is planted
- Drill downs: search/filter the display of all varieties within a particular

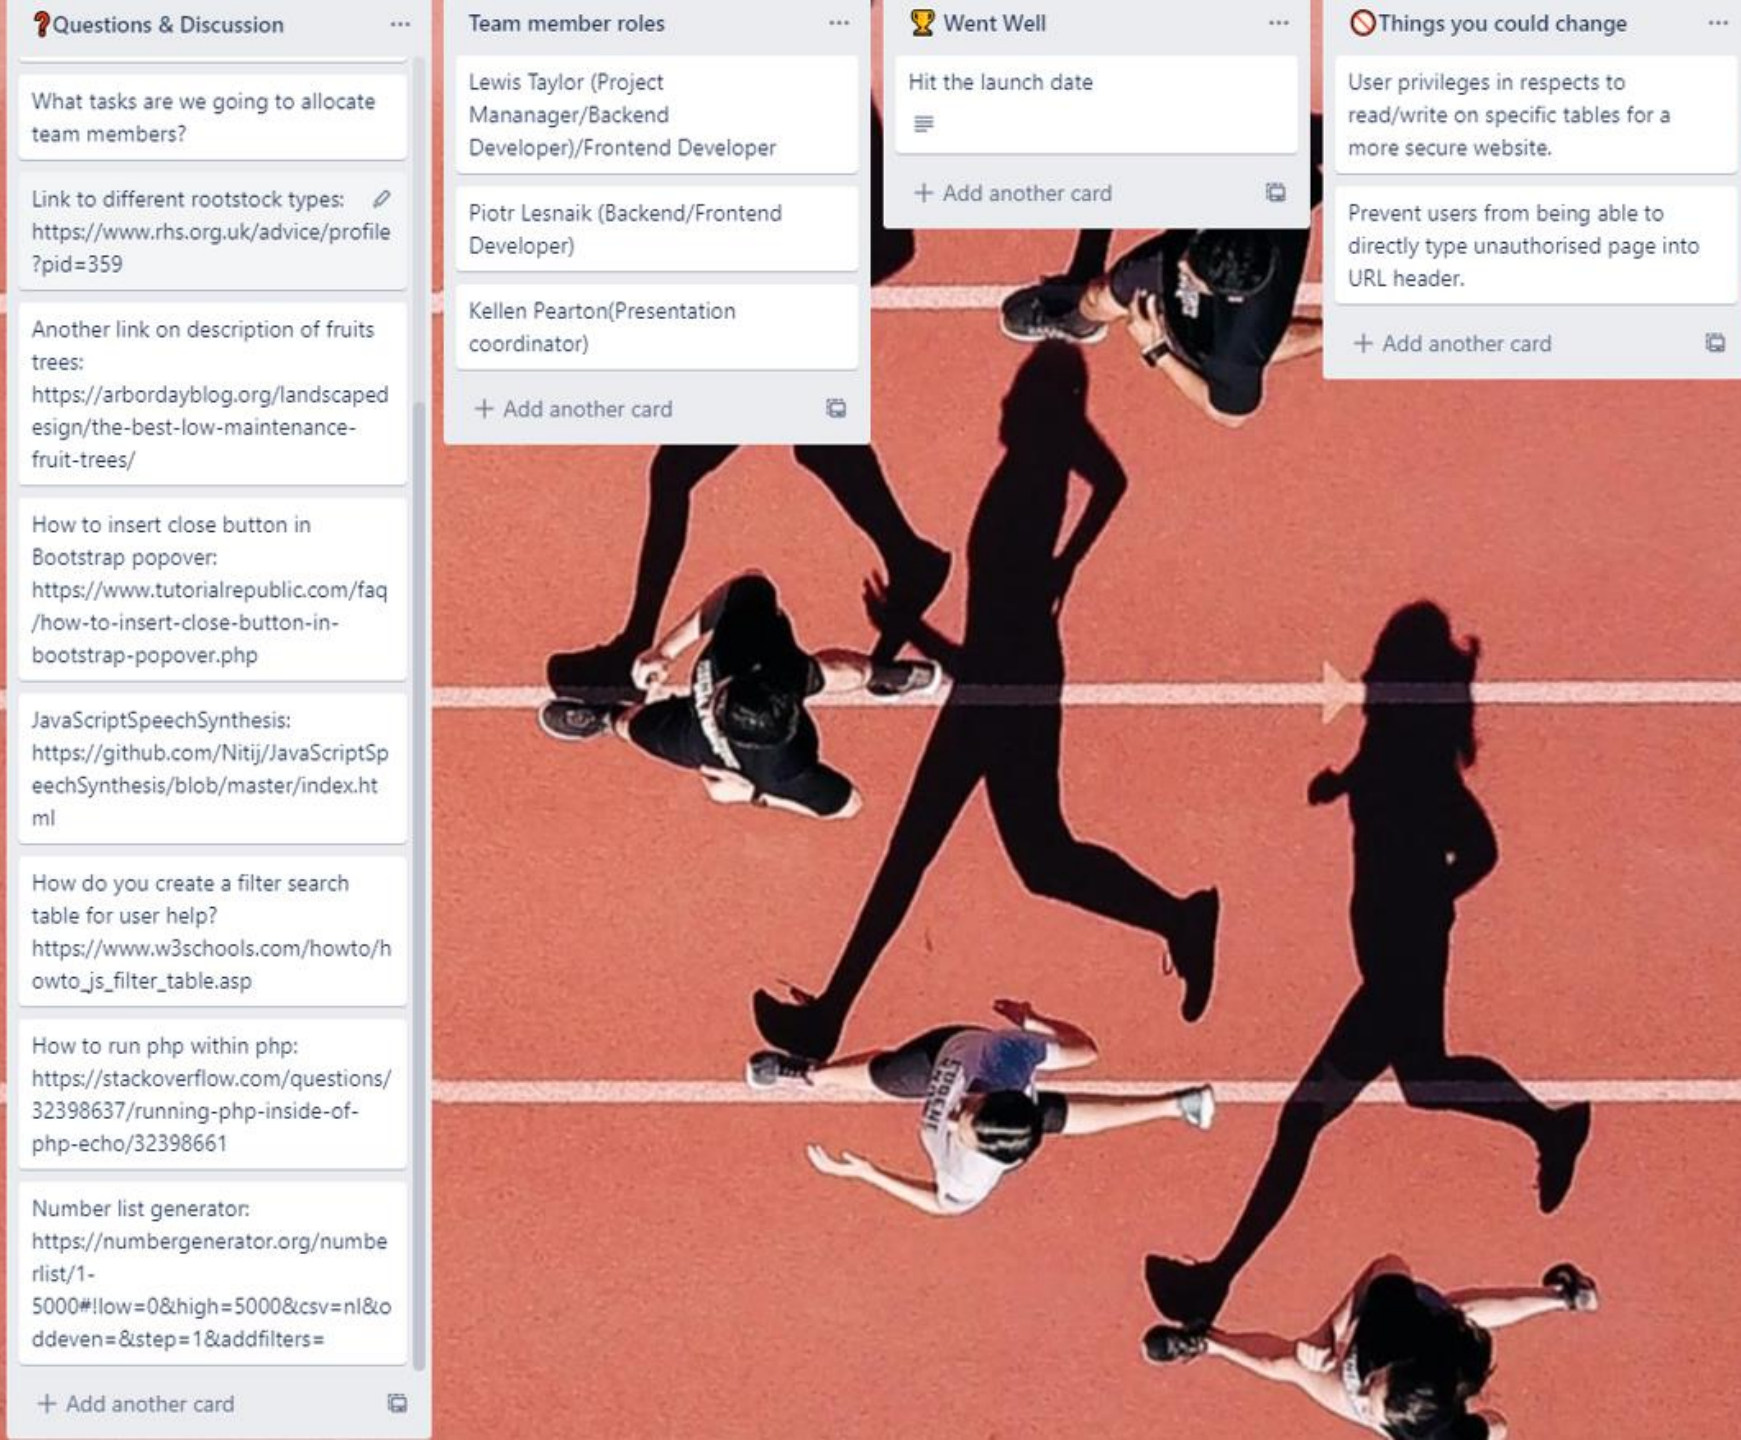

All four sprint cycles that were taken in chronological order from left to right

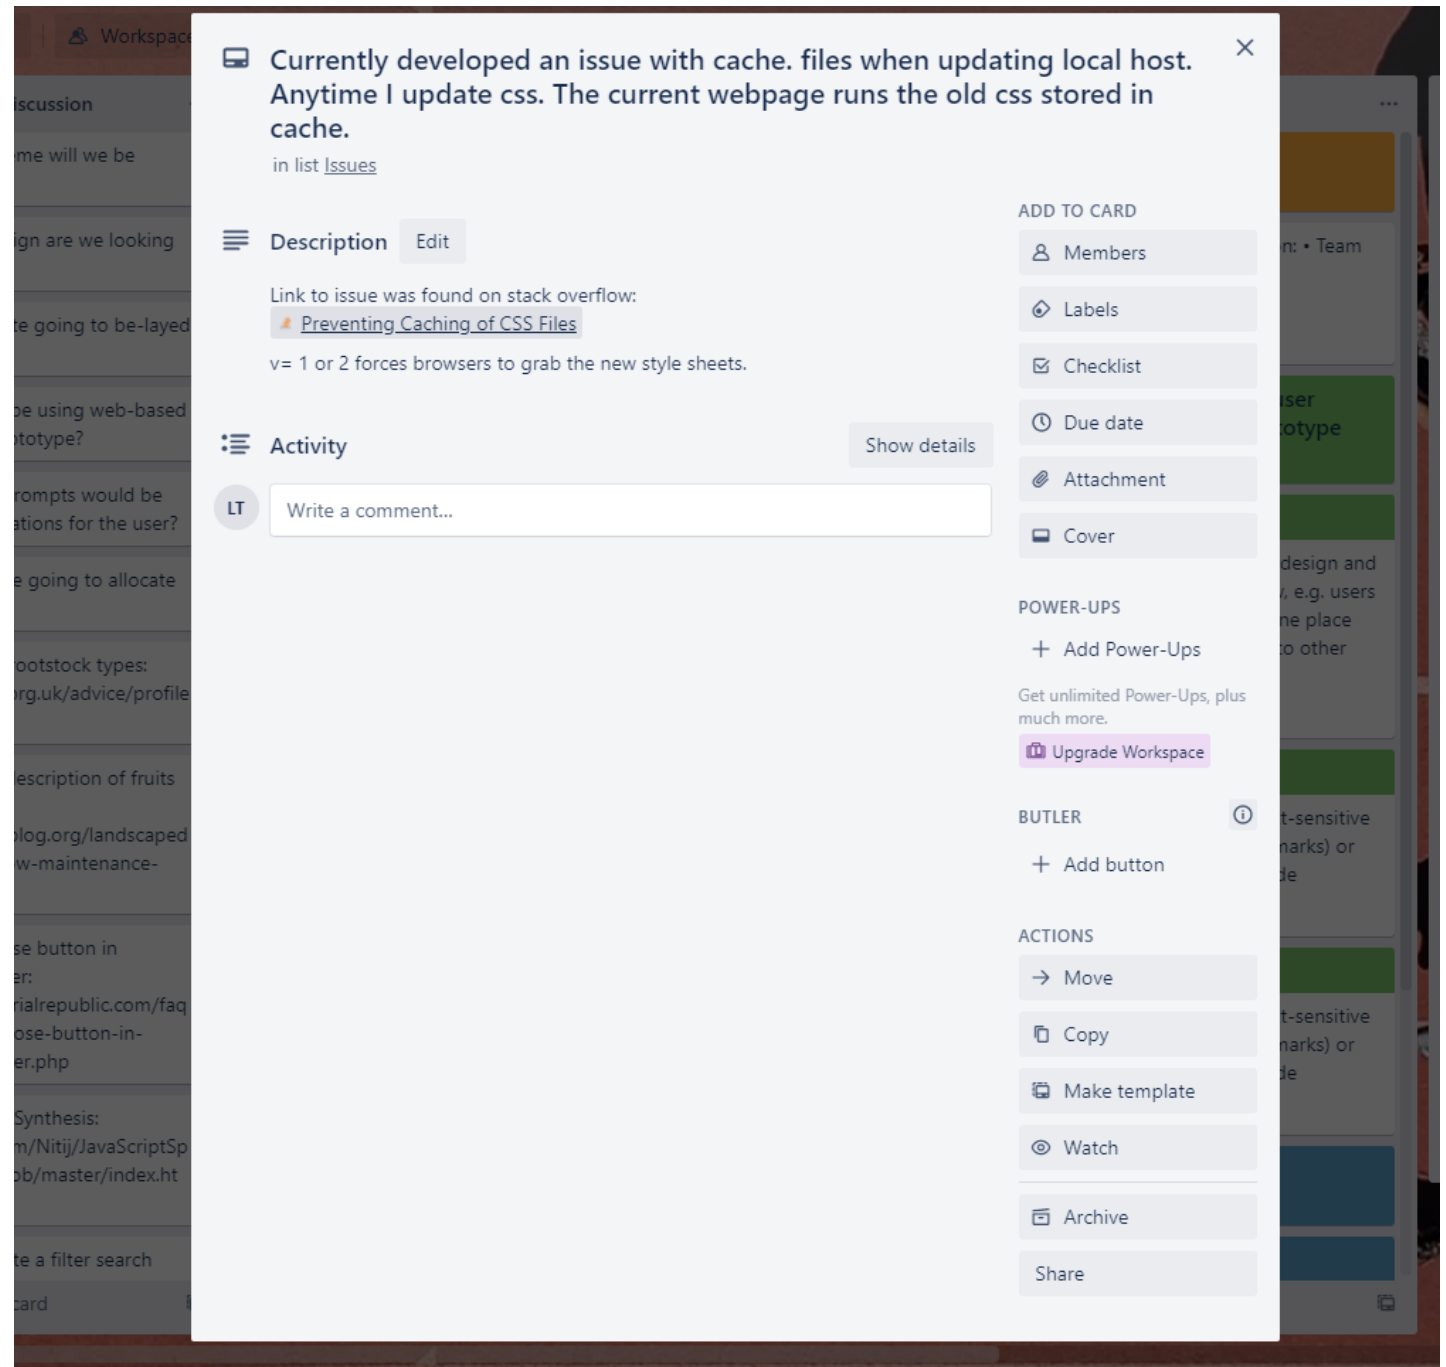

Here we have issues that were posted to Trello for other team members to potentially solve or to come back to at a further date

Here questions and solutions to questions were discussed, team member roles were allocated and things that could've been changed that we could not solve were mentioned briefly

Example of resolution of issues

The screenshot shows a Trello card titled "Currently developed an issue with cache. files when updating local host. Anytime I update css. The current webpage runs the old css stored in cache." with a close button (X) in the top right corner. Below the title, it says "in list [Issues](#)".

The card has two main sections: "Description" and "Activity".

Description (with an "Edit" button):

Link to issue was found on stack overflow:
[Preventing Caching of CSS Files](#)
v= 1 or 2 forces browsers to grab the new style sheets.

Activity (with a "Show details" button):

Example of resolution of issues

The screenshot shows a Trello card interface. The card title is "Trying to solve why repeated instances of images keep appearing on pages." and it is located in the "Issues" list. The card has a "Description" tab selected, showing a detailed explanation of the problem and a solution involving a combinations generator, a number generator, and a sublime txt editor. It includes two links: <https://planetcalc.com/4242/> and <https://numbergenerator.org/numberlist/1-5000#low=0&high=5000&csv=nl&oddeven=&step=1&addfilters=>. The "Activity" tab is also visible, showing a comment input field. On the right side, there are several sections: "ADD TO CARD" with options like Members, Labels, Checklist, Due date, Attachment, and Cover; "POWER-UPS" with an "Add Power-Ups" button and a link to "Upgrade Workspace"; "BUTLER" with an "Add button" option; and "ACTIONS" with options like Move, Copy, Make template, Watch, Archive, and Share.

Trying to solve why repeated instances of images keep appearing on pages.
in list [Issues](#)

Description Edit

Issue was solved by using combinations generator, number generator and sublime txt editor to copy and paste current and potential URLs that could be assigned to given pages when new a column is added to the table. Links:
<https://planetcalc.com/4242/>
<https://numbergenerator.org/numberlist/1-5000#low=0&high=5000&csv=nl&oddeven=&step=1&addfilters=>
